HIGH-FLYING NEWS

Gold can be a solid bet in uncertain times

Money

Investors have historically turned to gold because of its stability. Gold can act like a safety net in your portfolio because its value tends to stay afloat – even when the stock market dives. It's also considered a hedge against inflation, meaning its value can rise as the buying power of cash goes down. Check out our list of top-rated Gold IRA providers, including some that offer educational materials for gold-investing beginners.
